The HydraFacial Obsession: What's the big deal?

The popularity of HydraFacial is undeniable. Hollywood celebrities are reportedly obsessed with the in-office treatment. An *Allure* magazine article posted on May 22, 2018 reported, "Somewhere in the world, a HydraFacial is performed every 15 seconds." So what is different about this treatment? The award-winning HydraFacial system merges invigorating spa therapies with advanced medical technology to enhance skin health. It is the only hydradermabrasion device that combines cleansing, exfoliation, extraction, hydration and antioxidant protection in one treatment, resulting in clearer, more beautiful skin with little-to-no downtime. This is why it is also called the "5-in-1" facial!

What's special about HydraFacial is its versatility, super-consistent results, and customizability. HydraFacial is beneficial for nearly all ages, complexions and concerns. What's more, the treatment utilizes painless suction to remove debris from pores as opposed to manual extractions which can be painful and prone to unfortunate side effects including redness and potential for eruptions.

The treatment can be customized and enhanced with boosters, which are "super serums" that address specific skin concerns such as fine lines and wrinkles, brown spots, oily/congested pores, and a dull complexion.

Lymphatic drainage can further pump up results. Ideal for anyone interested in detoxifying, this process aids in removing toxins and ultimately leaving the skin with a healthy glow.

HydraFacial addresses the appearance of:

- Fine lines and wrinkles
- Elasticity and firmness
- Even skin tone and vibrancy
- Skin texture
- Brown spots
- Oily and congested pores
- Enlarged pores

Anti-Aging Hero

ZO Sun Protection Portfolio

The ZO sun protection portfolio is hands down this summer's anti-aging hero. These scientifically superior sunscreens deliver the broadest, most comprehensive range of sun protection available:

- **Provides potent UVA/UVB protection** offering both physical and chemical sunscreen options
- **Prevents free radical damage** (i.e., future skin cell damage) using an exclusive 12-hour time release antioxidant complex
- **Stimulates collagen production**
- **Shields the skin from the aging effects of HEV** (high-energy visible) light, which comes from many daily sources including the sun, fluorescent and LED lighting, smart phones, computers, tablets and more.
- **Oxybenzone free**

From non-greasy, quick drying sunscreen designed to match any skin tone to lightweight mineral sunscreen for sensitive/post-procedure skin to tinted sunscreen with primer, ZO has something for everyone and is just the thing for keeping your skin healthier and younger looking on summer days and every day.
